<b>Radio Frequency</b>	433.42 MHz	
<b>*Sound Level</b>	57 dBA	54 dBA

### Sound level:

\*According to standards ISO 3741 NF 31022 in dBA ref 1pW at nominal torque without end product.

### Fabrication recommendations:

- Operational noise level is reduced when motor, tube, and mechanical accessories are properly adapted to motorized applications.
- Free plays have to be minimized between the accessories and the end product tube to ensure quiet performance of the motor.
- Interior Tube Diameter (ID) > or = 38mm must be respected to prevent contact with the basic motor tube.
- 400 Series Drive Stop and Screw (9147894) is recommended to prevent noise and drive wheel separation from motor shaft.
